

COMMUNITY

Two social impact themes will be explored in our activated production this summer! The set and costumes for the production will be designed to include upcycled items as we examine the importance of reducing, reusing, and recycling for our global community. The second is the theme of embracing who we are regardless of size, age, class, race, gender, and ethnicity.

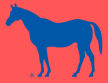

We are bringing to life the vibrant and creative world of Seuss like never before! Join us as we turn an array of classic characters on their head and modernize them to explore relevant social challenges in our Community through innovative storytelling and our upcycled set design!

COMMUNITY

We are partnering with Live Green Lexington as they facilitate drives to collect materials for our set, as well as educating participants on the importance of reducing, reusing, and recycling. In addition, they will be providing recycling information and collection stations during the performances!

In an effort to make our Emerging Track accessible, our partnership with the Kenwick Community Center provides the opportunity to participate in our production as well as learn basic musical theatre skills from the ACTivate staff as part of their Kenwick Camp. The Kenwick Community Center is also providing transportation for the performance.

STAFF

ACTivate: artists with purpose

Professional performing arts training for high school ,middle school and upper elementary aged students. ACTivate takes a holistic approach to training by focusing on increasing artistic skills, navigating the logistics of becoming a working artist, and cultivating artists who strive to make an impact in their community with their art.

Our staff of professionals are accomplished artists, celebrated educators and community advocates for collaborative, empowered, and diverse storytelling.
